New GT Power Electric Start Inverter Generators

Available soon – Order Now to Secure your Generator

3800W Electric Start Inverter Generator

GT3800Ei

With 3800W (max) and compact design this single phase 230V inverter generator is ideal for camping, on-site, or house-hold backup.

- 3800W (max), 3500W (cont.)
- Push Button Electric start with EZ recoil backup for easy starting.
- Powerdyne 4-Stroke OHV engine for ultimate durability and reliability.
- 2 x 15A, 230V outlets, 2 x USB outlets.
- Smart throttle for quiet operation and fuel savings.
- Digital control panel for simplified engine management and parameter monitoring.
- 12V charging capability for easy charging of small 12V batteries.
- Low oil shutdown helps to prevent generator damage if oil level is low.

\$1295 +gst

(\$1,489.25 incl.gst)

4600W Electric Start Inverter Generator

GT4800Ei

With 4600W (max) and compact design this single phase 230V inverter generator is ideal for camping, on-site, or house-hold backup.

- 4600W (max), 4200W (cont.)
- Push Button Electric start with EZ recoil backup for easy starting.
- Powerdyne 4-Stroke OHV engine for ultimate durability and reliability.
- 2 x 15A, 230V outlets, 2 x USB outlets.
- Smart throttle for quiet operation and fuel savings.
- Digital control panel for simplified engine management and parameter monitoring.
- 12V charging capability for easy charging of small 12V batteries.
- Low oil shutdown helps to prevent generator damage if oil level is low.

ELECTRIC START

New Stock Arriving Soon

2000W Electric Start Inverter Generator

GT2100ESi

With 2000W max output and compact design, this single phase 230V generator is ideal for camping or household backup power.

- 2000W (max.) power output, 1700W (cont.) power output
- Powerdyne 4 stroke, air cooled, OHV industrial engine
- 1 x 15A, 230V outlet, 1 x 8.3A, 12V outlet
- Push button electric start with backup EZ recoil makes starting easy
- Increase power while maintaining the flexibility and convenience of compact design with optional parallel function
- Highly portable and compact under 20kg!
- Up to 7 hours run time
- Featuring Eco mode button for efficient running
- Wireless remote starting - start the generator from 50m away (max).

WHY kranzle® ???

All Kranzle machines include these industrial features:

Solid Brass Pump Head

10 year guarantee on pump head!

The pump head is manufactured by Kränzle in Germany from forged special brass and guarantees an extremely long corrosion free life with a 10 year guarantee.

Slow Runner

Slow running, silent and durable!

The machines (except for KHD7/122TS & KHD10/122TS) are equipped with slow running, silent and durable quadripolar industrial quality electric motors (1400rpm).

Stainless Steel Plungers with Ceramic Coating

Excellent thermal conductivity and extremely low-wear

All units are equipped with ceramic coated stainless steel plungers. This excellent feature of stain-less steel plungers include, excellent thermal conductivity, hard ceramic coating (extremely low Wear) This serves to considerably increase the service life of our systems - No cracked ceramic plungers!

Dry-Run Safety

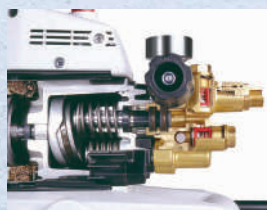

Protecting the life of your machine

All pumps are equipped with a fabric sleeve and a Teflon graphite back ring. The superior gliding properties of Teflon graphite serve to reduce both the friction resistance and temperatures in the pump. As a result, the systems can be operated undamaged without water for a certain period = dry-run safety.

Non-Corrosiveness and Durability

Breakdowns due to corrosion are impossible!

All parts of pump and safety devices that are in contact with water are made of stainless steel or special brass.

Bypass Operation

Significantly prolonged service life

All machines switch over to a low pressure bypass operation as soon as the gun is closed. The water is circulated with a residual pressure of approx. 10 bar. Machines with the additional option of total-stop switch off completely at this point. Pump and motor are shut down resulting in a significantly prolonged service life, as well as energy savings.

Continuously Adjustable Pressure & Water Control

Easy to use and easy to handle

For all machines, the operating pressure and thus the amount of water can be exactly adjusted to suit the cleaning task.

Quality Pressure Gauge

Kränzle quality in every detail
All machines are equipped with a large conveniently located glycerine filled stainless steel pressure gauge.

Build Quality

Kränzle's Q.C. checks involve stringent testing of every machine!

An individual checklist is yours to see with every parameter checked before leaving the Kränzle factory. This ensures Kränzle's reliability record is kept 100% from day one.

The Pump Assembly

Innovation with a view to quality and long life service

While all the innovative features of the Therm pump/inloader assembly are too numerous to cover, some of the following stand out. Patented unloader assembly ensures no load under bypass conditions, safety devices, brass pump head (10yr guarantee), stainless steel valves, ceramic pistons and much more. The use of the ultimate components produces the ultimate pump.

Hose Drum Options

The accessory you have always wanted now included!

Kränzle's hose drums include 20m of high quality steel braided hose, rotation lock and easy access. You'll wonder how you could have used a unit without this extremely practical option.

Safety Devices

- A pressure control valve for continuously variable adjustment of water quantity and pressure. This valve also allows for pressureless bypass operation.
- A safety valve protecting the machine against excessive overpressure.
- An integrated flow monitor device switches the burner off if the water flow is too low, thus preventing the combustion chamber from overheating.
- A pressure monitoring device only allows burner to operate if there is sufficient pressure
- An additional differential pressure switch automatically switches the machine to stand-by 30 seconds after the trigger gun is released
- Thermal overload switches off machine in case of excessive power consumption.

Heavy Duty Three Phase Steam Cleaners

- The best in the business!

Adjustable pressure and temp. control up to 140°C, destroying grease and grime quickly and easily. Featuring a 25L fuel tank for long operating times and dry

run protection for peace of mind on work sites. Ideal for cleaning trucks, tractors, concrete and heavy duty jobs - built to last a lifetime!

Features include a 20m hose on drum, 4 way safety system with overload protection and continuously adjustable pressure & digital temperature control.

- 2830psi
- 14.9L/min cleaning power

Reduction in Noise

Approx. 50% noise reduction versus a typical forced air heater.

Cleaner Combustion

Dedicated combustion air provides tightly controlled air/fuel ratio for optimum combustion.

Precise Temperature Control

Convenient thermostat for varied heat output and precise temperature control.

Maintenance Free Operation

High performance pump does not require replacement or adjustment. No critical air filters to clean/replace.

Cold Weather Performance Guaranteed

High performance pump - not air pressure sensitive.

Increased Efficiency

Energy efficient motor.

Product Durability

Cool down cycle built in for longer lasting components.

Multi Fuel Capable

Conveniently run kerosene or diesel fuel.

Understanding The Importance of Certification Classes

Discussions around correct protection in the workplace from breathing hazardous dusts, and the associated health risks to workers, is becoming increasingly prevalent in the industry. Worksafe NZ are fast moving towards legislation that will make it compulsory to use M-class vacuums for MDF and concrete dusts, just as the UK government has done. Under current legislations any PCBU has a duty to eliminate risks, thus investing in the right vacuum cleaner for dust extraction now will save you being left in the dust.

International Compliance Identification System

L-Class is suitable for low/moderate risk dust extraction. Low risk dusts include household dusts, general dirt, soils, plaster, aluminium, and some soft wood sawdust etc. With the L-class certification the vacuum cleaner filters catch 99% of dust (under 2 microns), with an exposure limit of $>1 \text{ mg/m}^3$

M-Class is suitable for medium risk dust extraction. Medium risk dusts include cement, concrete, paint, repair compounds, filler, clear coats, sand and wood (including MDF). With the M-class certification the vacuum cleaner filters catch 99.9% of dust (under 2 microns), with an exposure limit of $>0.1 \text{ mg/m}^3$

H-Class is suitable for high risk dust extraction. High risk dusts includes dusts with mould spores, asbestos, crystalline silica, mineral fibers, bitumen, and artificial mineral fibers (e.g. glass wool). Also included in H-Class are dusts contaminated with carcinogens or pathogens. With the H-class certification the vacuum cleaner filters catch 99.995% of dust (under 2 microns), with an exposure limit of $>0.1 \text{ mg/m}^3$

All DURAVAC Vacuums come with a high efficiency H13 HEPA filter, consistent suction performance and integrated filter cleaning system to help you avoid unnecessary exposure to harmful dusts. The NEW DURAVAC PRO SERIES features multi-stage filtration system to further increase filtration efficiency, powertool connection socket with automatic/stop start, speed regulator, LED Warnings and bag full indicators to alert user to clogging issues or full filter to minimise risk of dust exposure.

(\$1,029.25 incl.gst)

SAVE \$150!

3HP, 16CFM COMPRESSOR - 100L

AC1600i

- Physically the largest single-phase compressor in the Air Command range with a tank capacity of 100L meaning more air storage and less stops and starts
- Industrial Vemat electric motor with thermal overload protection.
- Heavy duty oversized slow revving, full shell bearing pump with a high air-flow flywheel and built-in after cooler for cooler, drier air supply and longer life.
- Ideal for workshops or the small factory where three phase power is not available.
- Best displacement 14.9cfm, 421L/min.
- Air delivery (@90psi) 11.9cfm, 337L/min.
- Max. pressure 145psi.

Air Command's largest single phase compressor

\$1595 +gst
(\$1,834.25 incl.gst)

SAVE OVER \$130!

7.5HP Workshop Three Phase Compressor - 270L

WS7.5

- Ideal for larger workshops where two or more air tools are required to run simultaneously
- Thermal amp overload protection
- 2 stage pump, cast bore for long life
- After and intercooler for dry air
- Pump displacement 830L/min, 29.3cfm
- Air delivery (@90psi) 630L/min, 22.2cfm

- Runs 2 x air tools simultaneously!

\$3395 +gst
(\$3904.25 incl.gst)

15.0HP INDUSTRIAL THREE PHASE COMPRESSOR - 270L

#IND15.0

- Large V4 twin stage pump - ultra efficient
- Star Delta starter with solenoid valve for controlled, time delayed start-ups - low amps draw start-up
- Pump displacement 1505L/min, 53.2cfm
- Air Delivery (@90psi) 1174L/min (41.5cfm)

- For three phase workshops!

\$7095 +gst
(\$8159.25 incl.gst)

Direct Drive Compressor

#COMPACT13

- Honda GC, 4.0HP - 4 stroke, recoil start.
- Tank design provides roll cage style protection.
- Vibration reducing suction feet.
- Ideally suited for on-site work with it's compact, light-weight design (only 24kg!)

\$2695 +gst
(\$3099.25 incl.gst)

HONDA 5.5HP TWIN TANK BELT DRIVE COMPRESSOR - 30L

#AC5.5P

- Genuine Honda GX160 5.5HP 4-stroke engine with recoil start - for quality and reliability.
- Belt driven two-cylinder pump with idle control reducing both pump and motor RPM when tank pressure reaches set cut-out
- Twin regulated quick coupler outlets
- Wheelbarrow design with large pneumatic wheel for stability and ease of transport

- Perfect for sitework, fencing, utes, or farm jobs
- Best displacement 14.03cfm, 397L/min.
- Air delivery (@90psi) 9.65, 273L/min.
- Max pressure 145psi

\$2555 +gst
(\$2938.25 incl.gst)

Heavy-Duty Petrol Compressor

350A SYNERGIC MULTIPROCESS MIG WELDER

#ADVANCEMIG350PACK

State of the art synergic technology with full operational controls on the remote wire feeder makes setup and operation a breeze. Rich in features including a 4 roll wire feeder and integrated protection systems for ultimate safety and reliability.

- Fully Synergic Operation ensures easy setup and operation
- Optional 10m Interconnect Cable for portability
- CC/CV operation for MIG TIG & MMA(Stick) functions.
- Lift TIG with gas solenoid operation
- Modular power source/Storage compartment can be upgraded to a watercooler setup easily
- 4WD Geared Wire Feeder Setup for bullet proof reliability with steel or aluminium welding
- Phase loss protection
- Super duty Industrial trolley, fits 'G' Bottle

320A ACDC TIG/MMA WELDING PACKAGE

#ADVANCETIG320PACK

The ADVANCETIG Series are at the top of their class featuring state-of-the-art IGBT technology. Results speak for themselves, achieved with top level features such as adjustable arc force, AC wave and a program saving function. Designed tough to last in rugged NZ workshops and on site tasks.

- Adjustable arc force, hot start & automatic anti stick control for greater control and ease of use for MMA welding
- Lift TIG and HF start modes for versatility when welding around sensitive electronic equipment
- Electronic HF TIG arc ignition system for contamination free and easy arc starting with low EMF interference
- 2T/4T trigger control modes
- Extreme stress testing to 550V in production for rugged reliability
- Dual digital display meters for accurate pre setting and feedback of welding parameters & output.
- Damage resistant industrial casing with front panel
- Digital up/ down button remote control and wireless optional foot pedal
- Easy quick connect inlet gas fitting for changing gas bottles.
- Package includes: Powersource, Trolley, Professional TIG Torch, Water Cooler.
