Corner Pipe Wrench

- 90° offset handle and compact head design allows you to reach any tight spaces.
- No jaw end comes out from the frame versus ordinary offset pipe wrench.
- Spring loaded jaw frame provides a ratchet like action for quicker operation in tight spaces, which allows you to keep tightening/loosing pipes.
- The most compact movable jaw wrench available.
- Size adjustment can be done very quickly by turning the worm gear. Forged steel handle.

- Chisel tooth pattern minimises tool chatter, and reduces the chip to a granular shape, in most materials
- Rapid removal of soft materials, that would normally load other cuts
- Made from solid carbide
