Transmig 185 Ultra

- Multi-Process: MIG/STICK/TIG
- Auto set function pre-sets wire feed speed and voltage
- 4.3" colour LCD screen
- Tweco DX250 digital MIG torch
- Heavy duty back pack for accessories
- Quick connect gas hose assembly
- Duty Cycle
MIG (auto & manual): 185A @ 20%
STICK (auto & manual): 185A @ 15%
TIG (auto & manual): 185A @ 20%

Part No. **W1006185**

\$2,205

10A Plug

Three welding processes packed into one space-saving machine. These easy-to-use CIGWELD inverters are portable and powerful giving you a wide range of welding applications for added productivity. A great addition for your workshop or worksite.

Transmig Packages Include:

- Power source
- Tweco Professional Fusion 250 MIG torch
- Comet argon regulator/flowmeter
- Feed rolls, Contact tips
- Electrode holder
- Work clamp
- Gas hose assembly
- Operating manual

Transmig 355i Multi-Process Welder

A powerful 3 phase, 3 in1 Multi-Process inverter that operates at 355A @ 60% duty cycle and offers exceptional welding results across MIG, STICK and TIG, and the added convenience of CIGWELD's AUTO SET MIG feature for optimal plate thickness control. The Transmig 355i has an easy-to-use push-button design, convenient memory storage, and is loaded with advanced features to ensure you can always customise your welds. Best of all you can operate it as a compact inverter or with a remote 4RX feeder.

Features:

- Superior arc characteristics and duty cycle
- Smooth, stable arc performance at 355A @ 60%.
- Push Pull gun compatible
- Transmig 355i is compatible with the CIGWELD TBI Push Pull torch (#185P958180) with Sync Box (#590P958000).
- Transmig 355i is compatible with the Tweco SGT250 spool gun (#W4011250)
- Voltage Reduction Device (VRD)
- Generator rating: 14KVA
- IP23S designed for heavy duty fabrication
- 3 Year limited warranty
- Plus more features

Contents:

- Transmig 355i inverter power source
- Transmig 4RX wire feeder (W3000410)
- Transmig 355i trolley (W4015005)
- Transmig 4RX interconnection lead, 8m (W4016002)
- Feedroll 0.9/1.2mm V groove (fitted)
- Tweco Fusion 400 MIG torch 3.6m
- Comet Professional argon regulator
- Flowmeter work clamp with 4m lead
- Shielding gas hose assembly
- Operating manual

Part No. **W1003510**

CIGWELD

AN ESAB BRAND

BlueVenom XF190

- Multiprocess MIG/STICK/TIG-DC-LIFT,
- Synergic MIG with QuickSet plate thickness settings
- Welding current range: 10-190A
- Welds up to 10mm steel plate thickness.
- Welds down to 0.6 mm sheet steel thicknesses.
- Suitable for use with 230/240V 10A Plug
- Digital LED screen for easy setting
- Opti-Start – soft and hard starting adjustable.

PACKAGE INCLUDES:

Machine, MIG gun, worklead and clamp, twist lock electrode holder and lead, 2 x feed rolls, gas regulator-flowmeter, argon gas hose, nylon inlet guide for soft wires and operating manual

- Suitable to run; add-on spool gun | standard on-off TIG torch or dial control TIG torch

Part No. **W1400190**

\$1,012

BLUEVENOM

SMOOTHARC TIG WELDER

Smootharc TIG 200 ACDC

Portable and lightweight. A powerful unit that delivers a top quality weld for mild steel, stainless and aluminium.

- A simple-to-use 15A TIG inverter that's ideal for light industrial, maintenance and DIY jobs.
- Offers pulse capability that allows you to control heat input – ideal for working on thin materials.
- Great for sheet metals, stainless steel and aluminium fabrications.
- Includes MMA welding capabilities with adjustable hot start, arc force and anti-stick functions.
- Complies to AS/NZS 60974-1 and IEC/EN 60974-10.

15A Plug

PACKAGE INCLUDES:

- Power source, TIG torch, Regulator, Work return lead, Gas hose, Operating manual

OPTIONAL EXTRA:

- Foot control (sold separately Part No. 340050-00018)

SMOOTHARC STICK WELDERS

Ideal for light industrial work NOW in robust metal casing

Suitable for a wide range of applications. These easy to use stick welders are affordable and robust and offer reliable features you would expect from a quality welder.

- Lightweight and portable
- TIG functionality
- Delivers smooth and stable arc
- Duty cycle:
20% @ 130A (MMA 130 VRD) and
15% @ 180A (MMA 180 VRD)
- Use with a wide range of welding consumables
- Digital screen shows your parameters clearly.
- Added VRD (voltage reduction device) reduces open circuit voltage to safer levels
- Robust and tough casing (IP23 rated)
- Compliant to AS/NZS 60974-1, IEC/EN 60974-10, and AS 1674-2 Category C Environment
- Backed by BOC's three year conditional warranty

EXPLORE THE POWER OF THE BEAST

When you need 500 amps+ the BEAST can deliver!

- MIG/MAG Welding
- Flux-Cored Arc Welding
- Arc Air Gouging
- Manual Metal Arc Welding

The BOC Smootharc Advance II BEAST 555R is a three phase MIG welder that offers high duty cycle with fine tune settings for optimum heavy-duty performance.

Smootharc Advance II MIG 555R

- The gruntest machine offered by BOC so far featuring 40% at 550A duty cycle.

PACKAGE INCLUDES:

- Power source with input cable
- Binzel ABIMIG® AT 455 MIG torch - 4m
- BOC Smootharc CO₂ & Ar regulator
- Work return lead - 3m
- Wire feeder (Both liquid cooled and gas cooled compatible)
- 10m inter-connecting cable (Gas cooled)
- Wire feed rollers
- MMA electrode holder - 3m
- Operating manual

Part No. **ADVANCEII555R**

\$5,883⁰⁰

If you want all this power and features with LCD digital technology then check out our **Smootharc Advance III 555R** on page 7.

Compact range for light industrial use

- Single phase inverter-based MIG machines
- Sleek design with inbuilt wire feeder
- Package includes a Binzel MB 24KD torch, electrode holder, regulator, work return lead, wire feed rollers, gas hose and operating manual
- Optional extra: BOC TIG torch (purchased separately. Part No. MMA-TIG)
- Ideal for maintenance workshops, automotive repairers, construction, tubing and sheet structures (ducting) and more.

Smootharc Advance III 225C

• Duty cycle 225C – 15% @ 225A

Part No. **ADVANCEIII225C**

\$2,934

Smootharc Advance III 255C

• Duty cycle 255C – 35% @ 255A

Part No. **ADVANCEIII255C**

\$3,020

Smootharc Advance

- MIG, MMA and Lift Arc TIG capability
- Full digital control with LCD screen design shows your parameters clearly
- Save specific weld parameters and retrieve them when required in the JOB settings – a real time saver
- Easy to install and operate
- Built for tough conditions – IP23 insulation rated
- Steel crane hooks on power source and wire feeder
- Ergonomically designed robust steel front handles
- Complies with AS/NZS 60974-1 and IEC/EN 60974-10

Remote range for medium to heavy industrial applications

Added features include:

- Higher duty cycles
- Portable wire feeder with 10m inter-connecting cable
- Cable hooks keep your cables safe and tidy off the ground
- Side tray (on power source) and torch holder (on wire feeder) ensure your tools are within easy reach
- Optional extra: BOC TIG torch (purchased separately - Part No. MMA-TIG) and water cooling unit (for 555R BEAST model only).

32A Plug

Smootharc Advance III 255R for light to medium industrial use

- Single phase inverter-based MIG machine
- Duty cycle 255R MIG – 35% @ 255A
- Wire feeder with 10m interconnecting cable
- Package includes a Binzel MB24KD torch, electrode holder, regulator, work return lead, wire feed rollers, gas hose and operating manual
- Ideal for maintenance workshops, automotive repairers, construction, tubing and sheet structures (ducting) and more.

Part No. **ADVANCEIII255R**

PULSE FOR MMA & DC TIG

Pico 160 cel puls VRD

- MMA welding made easy.
- Great start. Excellent arc ignition. No stick.
- Great finish. Less spatter. No gap.
- VRD compliant to AS 1674.2-2003; IEC/DIN EN 60974-1

Compact, powerful, reliable and only 4kgs. Create great quality welds with plenty of amperage. Pulse weld setting for both MMA and TIG. Perfect for welding thick to thin material.

Expert setting menu to safely limit the machines output to suit whether 10A, 15A or 20A single outlets are available which avoids nuisance tripping.

XQ

XQ SERIES VIDEO

Tetrix 230 XQ AC/DC 3.0 VRD

- Powerful, durable and easy to use ... this TIG welder performs at the highest level offering optimal welding results with perfect weld seams.
- New control panel with well laid out, intuitive design helps the welder know what settings are in play
- Variety of pulse versions available: Average value pulsing; thermal pulsing; automatic pulsing; AC special pulsing
- Less work required for repetitive tack welding with Spotmatic function
- So versatile ... it can be run directly from a single phase 230V power socket.

PACKAGE INCLUDES

- Power source
- TIG 300 G HD 2T 8P 4m gas cooled torch
- WK KL/Z 50mm² 4m work return lead
- Gas hose, 2m
- Pressure regulator

QUICKSET MIG

SMALL 10A MIG - AWESOME OUTPUT

The CIGWELD EasyWeld 130 welding machine offers many benefits of a professional welding machine in a compact, portable, easy to use and affordable self-contained single phase welding inverter.

With QuickSet Plate Thickness Pre-Sets installed the guess work is now taken out of the set-up, to allow excellent welding results.

- Electronic QuickSet control for accurate adjustment of the welding parameters.
- Suitable for MIG with shielding gas and MIG gasless welding.
- Welds most metals including mild steel, stainless steel, aluminium and bronze.
- The EasyWeld 130 machine is ideal for light fabrication, maintenance and repairs or DIY around the home, workshop, worksite, or farm.

Easyweld MIG 130

• Duty cycle: MIG 130A @ 20%, 75A @ 60%, 58A @ 100%

10A Plug

Contents:

- EasyWeld 130 power source
- CMG13DL MIG gun 3m- hardwired work clamp with 2.5m lead

WeldSkill 185 LCD Multi-Process Welder

10A Plug

The WeldSkill 185 LCD offers the many benefits of a professional welding machine in a compact, portable, easy to use and affordable self-contained single phase welding inverter - including a digital 2.8" LCD digital display to improve navigation of all functions via the full colour screen. The WeldSkill 185 LCD is equipped with an integrated wire feed unit, Voltage Reduction Device (VRD applicable in stick mode only), quick connect gas connection and a host of other advanced features.

Features:

- Suitable for use with standard 10 amp power point
- SGT250 spool gun compatible
- Ideal for aluminium fabrication, repairs and auto/marine work.
- Recommended generator: 10kVA (at 0.8 power factor)
- Fully compliant to AS 60974.1-2020 enclosure rated to IP21S
- 2 Year warranty on power source
- Suitable for gas and gasless wires

Part No. **W1008193**

\$1,213

Contents:

- WeldSkill 185 LCD power source
- MIG torch with euro connection, 3m
- TIG torch 17V 4m lead
- Twist lock electrode holder with 3m lead
- Cutskill argon regulator/flowmeter
- Work clamp with 3m lead
- Shielding gas hose assembly, 3m
- Feed rolls: 0.8/0.9mm flux cored (fitted), 0.8/0.9mm V groove
- Contact tip: 0.8mm (fitted)
- Operating manual (can be downloaded at cigweld.com.au/manuals)

PORTABLE WELDERS

**TIG &
MMA**

WeldSkill 205 AC/DC Multi-Process Welder

15A Plug

CIGWELD's Weldskill 205 ACDC is a digitally controlled, High Frequency ACDC TIG welder with added MMA capability. Small and compact it offers all the features (such as Up/down slope, Pre/post flow, 2T/4T, Spot mode and gas purge and pulse mode) for even greater control of your weld. Ideal for indoor or outdoor use, the size and weight makes this unit easy to take into tight spaces.

Features:

- Duty cycle HF TIG - 205A @ 20%
- Duty cycle MMA - 160A @ 20%
- 15A supply lead
- Light and portable 12kg power source
- Can TIG weld up to 8mm aluminium plate
- Can MMA weld with up to 4mm electrodes
- 3 Year warranty (refer to operating manual for further details)

Part No. **W1008205**

\$2,108

CIGWELD's WeldSkill 205 AC/DC is a 15 Amp 240 volt, digitally controlled, High Frequency AC/DC TIG (GTAW) and Stick (MMAW) inverter. This unit is specifically designed for the budget conscious who doesn't want to sacrifice on quality or weld results.

BOC Smoothcut Plasma 100C AIR

Medium to heavy metal fabrication

- Powerful three-phase cutting • Fast, safe and efficient
- Convenient in-built air compressor for quick and easy cuts
- Connects to external compressor for heavy-duty jobs
- Recommended cutting thickness of 1mm-30mm means it will suit a wide range of industrial and commercial applications
- Easy to use... easy to move
- Complies to AS/NZS 60974-1 and IEC/EN 60974-10
- Backed by BOC's three year conditional warranty.
- Package includes quality Trafimet-style plasma torch with a generous cable length and a double insulator trigger that prevents accidental start-up – a great safety feature.
- Generator rating 15kVA

NEW

The Cutmaster Plus series is the perfect combination of power and portability for hand-held plasma cutting machines. Plus means more, so we've added a user-friendly 4.3in. TFT LCD screen and we've also upgraded the power of the machine to provide more control and flexibility so you can master any genuine cutting with ease. Together with the SL60 1Torch, it all adds up to the total plasma cutting package.

FEATURES

- Portable and durable with three handles and lightweight, industrial all-weather housing
- Bright 4.3in. TFT LCD display with glove-friendly adjustment knob simplifies use and provides greater control and flexibility
- Comes with industrial SL60 1Torch with 2T/4T function, safety trigger lock, and double-tap trigger to conserve bottled air
- Switch between normal and mesh cutting modes
- Industry leading 3-year warranty on power supply and 1-year warranty on torch and leads

* Plug purchased separately.
Customer responsible for fitment by qualified electrician.

HIGH POWERED weld fume extraction

Get to the source. Remove welding fumes from where they begin.

Combines the highest suction output and intelligent energy-efficient functions with simple handling.

Fume Extraction Combo

• 230V Extractor and Binzel Torch

Part No. 601.KFEC

\$6,784

FEC - Fume Extraction System with Cyclone Technology - 230V

Mobile high vacuum extraction.

The FEC (Fume Extraction Cyclone) is considerably more flexible and efficient than stationary, central or hall extractors. It extracts fumes that are created during welding with a high vacuum of 19,000 Pa, a market-leading suction output. The FEC is particularly suitable for everyday industrial use and can be easily transported wherever it's needed.

FEC

Max. airflow	230 m³/h
Connection diameter	50 mm
Max. vacuum	19,000 Pa
Noise level	76 dB (A)
Voltage	115V 50/60 Hz 230V 50 Hz
Engine performance	1.1 kW
Plug	10A

RAB GRIP HE fume extraction torches captures fumes directly at the gas nozzle

These torches work perfectly with the Abicor Binzel's FEC system and xFUME VAC units.

They provide direct welding fume extraction which gives you a perfect view of the arc and helps you breathe easier.

- Air cooled
- Neck bend 45 degree
- 4m length

Speedglas™
Welding Safety

3M™ Speedglas™ G5-01TW Welding Helmet with Heavy-Duty Adflo PAPR

The all-new 3M Speedglas Welding Helmet G5-01 TW with Heavy-Duty Adflo PAPR is an upgraded version of the hugely popular 3M Speedglas 9100 FX Air, with a suite of new technology. It offers a larger viewing area with superior optics as well as a 15% larger clear grinding visor, climate control, 50% longer Adflo battery runtime, Bluetooth lens technology, extra head and neck protection and an optional task light!

- Flip-up clear grinding visor (170 x 104 mm), 15% larger than the 9100 FX Air
- A massive 73 x 109 mm viewing area
- True-View optics for improved colour and contrast
- Adflo PAPR has a 50% longer battery runtime compared with the standard 9100 FX Air (12 hours)
- Removable welding visor reduces weight by 35%
- New Tack Welding Mode for a smoother dark-light transition
- Bluetooth connectivity for memory modes
- Shades 3/5, 8-13
- Made in Sweden with Auto On
- Highest possible optical classification (1/1/1)
- Revolutionary powered airflow delivery results in improved respiratory protection and comfort (AS/NZS1716)

Part No. AWS617820

BREATHE SAFELY

MANAGING WELDING FUME EXPOSURE

Translas On-gun Fume Extraction

All welding processes generate welding fume. Some produce very little fume while others produce considerable amounts. Welding fume consists of particulate fume (the cloud of smoke you can see rising) and gaseous fume (that you can't see but sometimes smell).

In most cases, welding fume is formed close to the arc near the welder, but some of the gaseous fume can be generated well away from the arc. The potential effect on the body of exposure to welding or cutting fume depends mainly on the amount of fume produced, what's in it and the length of time the worker and/or workers are exposed to the fume.

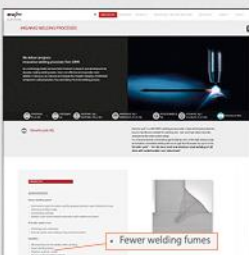

Compare BOC Shielding Gases range

Maintaining your lungs as a welder and keeping your workmates and workshop safe from welding fumes is vitally important.

In March 2017, the International Agency for Research on Cancer (IARC) re-classified welding fumes as carcinogenic to humans so, if you haven't already, now is the time to take notice and take action of the air you (and others around you) breathe.

EWM Reduced fumes with unique waveform

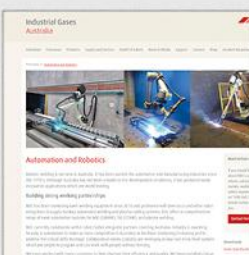

BOC can help manage your exposure to welding fumes and assist you with...

- Your selection of low fume welding process
- Using EWM welders with patented waveform controls (coldArc, forceArc and forceArc puls) which have been proven to significantly reduce fume generation for MIG/MAG
- Your selection of low fume shielding gases eg. replace CO2 with argon based and Performance Line shielding gases
- Automated welding systems (eg robotic and cobot systems) to help limit employee exposure to welding fume
- On-gun fume extraction
- Welding fume extraction packages
- PAPR (Powered Air Purifying Respirators)

Speak with a BOC Metal Fabrication expert in your area.

GAS & WELDING

THE LEGEND OF WARRIOR 'WELD GUARD'

Deep within the homeland of the vikings, storytellers have spoken of the legend of WeldGuard. Eternal wars and battles between the gods and giants have taken their toll on the dwindling breed of metal workers who create the necessary tools for brave viking warriors. Excessive heat, unruly sparks, and burning uv rays have no place when working with metal. Now a new welding warrior has emerged ... WeldGuard
—Born to protect Welding Legends like you.

Angle Grinder 125 mm - 850 W

- Robust, universal and economical
- Powerful 850 watt motor with good overload capacity
- Twist-proof guard

Part No. **W850-125**

\$187

10% OFF

Angle Grinder 125 mm - 1400 W

- **Quick-locking nut**
- Robust, universal and economical
- Tool free, fast disc change at the touch of a button
- Safety clutch for maximum user safety
- Electronic soft start and restart protection

Part No. **WEQ1400-125**

\$316

10% OFF

Angle Grinder 125 mm - 1500 W

- **Ergonomic soft handle**
- Powerful and robust with ergonomic soft handle for low-fatigue working - especially overhead
- Powerful motor with good overload capacity
- Electronic safety shutdown reduces kickback for high user safety

Part No. **WE1500-125RT**

\$339

10% OFF

Angle Grinder 125 mm - 1350 W

- **Quick-locking nut**
- Powerful and robust with high power density
- Longer service life with patented dust protection, up to 20% more overload capacity and 50% more torque
- Tool free, fast disc change with Metabo M-Quick-System
- Low-vibration side handle
- Metabo S-automatic safety clutch minimises kick-back to the lowest level for maximum user safety

Part No. **W13-125Q**

\$399

Angle Grinder 125 mm - 1900 W

- **Quick-locking nut**
- **Deadman's switch**
- **Fast brake**
- Metabo M-brush technology: service-free carbon brushes with triple service life
- Longer service life, more power: the Metabo Marathon-motor with patented dust protection, up to 20% more overload capacity and 50% more torque
- Best anti-vibration system: up to 50% less hand-arm vibrations
- Paddle switch with dead man function: safe to operate due to an ergonomically integrated non-slip switch

Part No. **WEPBA19-125QDSM-B**

\$614

activArc®

- Dynamic TIG arc for targeted and concentrated heat input
- Safe TIG welding in all positions and panel thicknesses
- Full control over the arc energy
- Influence over the viscosity of the molten pool

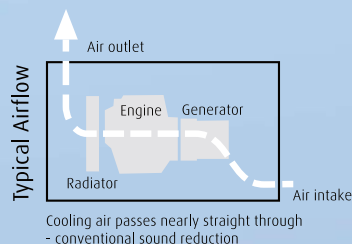

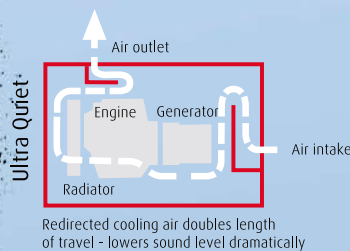

Spotmatic

- Saves on manufacturing costs
- Less tacking time thanks to the elimination of the usual trigger pulling
- Easy and accurate welding results
- No special torches required. Any standard TIG welding torch is adequate

Shindaiwa range of Ultra Quiet Diesel Generator Welders

BOC stocks and delivers across NEW ZEALAND.

Ultra-Quiet is a unique technology that minimises generator sound levels. An engineered enclosure, coupled with the use of specifically designed air dams and noise absorbent insulated panels, redirects the cooling air. This doubles the distance air must travel through the enclosure, significantly reducing engine noise. All Shindaiwa generator enclosures feature thicker panels – with special attention to the door panels, engineered sound absorbing foam and hardware. The result is lower sound levels as well as increased unit rigidity. A specially tuned muffler, plus the longer internal exhaust pipe achieve an improved balance of high and low noise frequencies.

Features

Duty Cycle	DGW300
	260A @ 80%. CC/CV Mode.
Welding Rod	2.0 – 6.0 mm Dia.
Water cooled diesel engine	Kubota D722 producing 11.7kW @ 3,000 rpm
Auxiliary power	7kVa: 2x 15A outlets Circuit breaker protected
VRD	Factory fitted
Battery Isolator	Factory fitted
Weight	370 kg

Benefits

- Allows operators to function in MMA, GMAW & SMAW modes along with carbon arc gouging.
- Give operators great flexibility to handle a wide range of welding demands.
- Operator protection against electric shock.
- Peace of mind for operators with Kubota's reliability, parts availability & serviceability.
- Gives operators the flexibility to run hand grinders, compressors & portable inverter welders.
- Machine can be carried on any standard utility vehicle or single axle trailer.
- Allows machine to be locked out when not in use.

Features

Output Current (Single Operator) (Dual Operator)	DGW420	DGW500
	290A @ 60% 200A @ 100%	480A @ 60% 230A @ 80%
Welding Rod (CC Mode)	2.5 – 8.0 mm Dia.	2.5 – 8.0 mm Dia.
Droop Mode Standard	Yes	Yes
GMAW/SMAW (CV Mode)	Welding Wire up to 2.0 mm	Welding Wire up to 2.4 mm
Water cooled diesel engine	Kubota D1105 producing 18.5kw	Kubota V1505 producing 24.5kw
Auxiliary power	14kVa: 1x 20A & 3x 15A RCD protected outlets	15kVa: 1x 20A & 3x 15A RCD protected outlets

Benefits

- Gives operator/s flexibility & increased productivity over a single operator machines.
- Gives operators greater scope to handle all types of welding.
- Permits operators weld pipe & tanks.
- Comprehensive range increasing flexibility for operators.
- Peace of mind for operators with Kubota's reliability, parts availability & serviceability.
- Gives operators the flexibility to run hand grinders, compressors & portable inverter welders.

Easy operator interface with 3-way switching in either Welding, Generating or simultaneous modes. Emergency stop and key lockable operation modes.

Preset Current and Voltage Control with easy to read digital output. 14-pin wire feeder, and 9-pin remote control connections.

Auxiliary IP66 rated 240V and 415V/50Hz power outlets with ELCB protection provide power for additional tools or site lighting, while protecting workers.

A fully banded mine-safe spill containment tank, along with easy access to the spill controls, keeps the worksite clean and safe. Standard on DGW420, and optional on other models.

ECO offers flexibility, reduced noise, exhaust emissions and fuel reduction via its automatic idle control.

Lockable single-side service access with battery lockout. All components of the generator and diesel engine are readily accessible, and replacing filters and other consumables is simple. External drains are conveniently placed for easy access.

NEW 600 Model

shindaiwa®

50Hz 3P Operation

Kubota Turbo Engine

116PSI Oil Free Compressor

600A Dual Welding
Operator Output

Ultra Quiet Operation 59dB(a)

Bunded Fuel Tank

Introducing the Shindaiwa DGW600DM-AC, the latest addition to the Shindaiwa product lineup. This top-tier welding machine with air capabilities boasts unparalleled quality, power, air and welding versatility-all in one machine.

CV mode offers 520amps and CC mode offers 570 amps. In dual operator mode, the DGW600 delivers a dependable 300 amps at a 100% duty cycle.

What sets the DGW600DM-AC apart is its practical features.

Equipped with 1 x 32-amp outlet and 3 x 15-amp outlets, all operating at 50Hz, this machine ensures versatility in power supply.

Additionally, it comes with a 116 PSI oil-free scroll-type compressor for air-related tasks.

One notable advantage of Shindaiwa welder generators is their minimal operating noise, and the DGW600DM-AC is no different, with a leading-class noise level of just 63dB(a).
